Welcome to CodeCore College

CodeCore College is already the leading Bootcamp in Vancouver, Canada teaching cutting-edge web technologies. We have graduated 400+ full-time students over the last 5+ years, and now, many of them are leaders in the Vancouver Tech scene.

The original CodeCore Bootcamp curriculum was developed by our team of industry veterans, who continuously consult with our Corporate Hiring Partners to review, update and optimize our program.

With the help of that team, CodeCore is adding some exciting new programs that will take us from being simply a programming bootcamp and transforming us into a dynamic, University-Transfer technology and business college with two central locations.

CodeCore College is poised to help the students from all over the world navigate new technologies, new careers and dynamic futures. Our amazing community is ready to welcome you, and we hope you soon will become a part of our extended family.

Est. 2008

Welcome to New Westminster

Our college campus in New Westminster allows the best of the city with access to affordable neighborhoods for homestay and rentals, easy transit to shopping, parks and the city center of Vancouver as well as it's own vibrant community of character homes, festivals and exciting summer riverfront events. New Westminster is the oldest city in Western Canada and the the first capital of British Columbia. CodeCore is proud to have our college location in a community with a proud heritage and a great spirit.

New Westminster

Vancouver

Welcome to Vancouver

Greater Vancouver is one of Canada's most renowned cities - not only for it's natural beauty, but also for being an educational hub. The location of many universities and colleges, it's a great place to seek opportunity in education and begin a successful new career.

Scenic views, mild climate and friendly people have made Vancouver regularly one of the best places in the world to live while the burgeoning technology industry attracts talent from all over the world -- 52 percent of the population speak a first language other than English making it one of the most ethnically and linguistically diverse cities in Canada.

Our Programs

CodeCore College is already recognized as a quality education destination of choice by both domestic and international students for our programming bootcamp. Our mission is to deliver the same level of excellence to students with our expanded list of courses-all of which can lead to further education with us or one of our University Partners.

Codecore Developer Bootcamp

Everything You Need To Succeed

Our bootcamp curriculum, was developed by a team of industry veterans and is continuously updated. In just 12 weeks, you will get the skills you need to start a career as a junior developer.

 HTML5 & CSS	 Javascript & React.JS
 Software Architecture & Object Oriented Development	 Ruby On Rails
 Popular APIs	 Design & User Experience

HTML5 & CSS

The fundamentals of prototyping and building for the web. You will learn HTML5 and CSS3, along with time-saving frameworks such as Bootstrap and Foundation. You'll become an expert in Responsive Design, enabling you to build designs that display elegantly across any number of mobile devices.

Software Architecture & Object Oriented Development

You'll learn the basic foundation for building modular and scalable software but practicing object oriented programming and exploring different software architecture methodologies.

Popular Apis

Learn how to use popular APIs like Foursquare, GoogleMaps and Facebook to make your applications connect and come alive--as well as how to build your own API, sharing out your data and ideas to the world.

Javascript & React.JS

Javascript: You'll learn how to make your application much more interactive and user friendly by utilizing the most popular programming language on the Web. Node: Learn to build entire full-stack applications with only Javascript using the Express framework with the Node Javascript engine. React: Use one of the most influential front-end frameworks to quickly build highly interactive single page applications.

Ruby On Rails

Used by companies like Twitter and LinkedIn, you'll learn the in's and out's of this very popular programming language, coming away well versed in Ruby, Rails philosophy and how to use popular version control systems such as Github and Heroku.

Design & User Experience

You'll receive hands-on training in basic user and design research and usability testing, invaluable skills for building user-centred applications and understanding how users interact with your prototypes and products.

Learn App Development With Javascript, Ruby on Rails and more!

Duration
12 Weeks
(Full Time)

CodeCore Programming Fundamentals

Beginners Always Welcome

Start with the basics before you dive deep with hands-on training and guidance. Discover the process of web development by making a web application which stores information and interacts with your visitors. You will discover if a coding career is the right thing for you. This part-time course prepares learners for the bootcamp.

 <p>HTML5 & CSS Basics</p>	 <p>Javascript Basics</p>
---	--

 <p>jQuery Basics</p>	 <p>Integration</p>
--	---

HTML5 & CSS Basics

- What is HTML & CSS
- Intro to HTML
- Document structure
- Tags: DIV and SPAN
- Tables
- Lists
- Typography
- Colors
- Classes and IDs
- Intro to CSS
- Styling divs
- Styling tables and divs
- Styling lists
- Navigation
- Forms elements
- Intro to Bootstrap

jQuery Basics

- Getting Started
- What is programming all about?
- Different types of programming languages
- Intro to Javascript programming language
- Numbers
- Strings
- Variables
- Functions
- Flow Control
- Arrays
- Objects
- Input and output
- Interacting with web pages

Javascript Basics

- What is jQuery
- Integrating jQuery
- Selecting with jQuery
- Event Handling
- Animations

Integration

- Persisting Data with Firebase
- Storing data to Firebase
- Retrieving data from Firebase
- Simple user authentication with Firebase
- Building an app with Firebase and jQuery

Destinations After this Program

After completing this course, students are eligible for admission into the 12 week CodeCore Intensive Web Developer Bootcamp or the One Year Web Developer Bootcamp.

Did you know?

This course's tuition is deducted from your tuition should you decide to proceed to the F/T Bootcamp program at a date in the future. This makes it an excellent way to test the waters before committing to the more intensive program.

Web Application Development Diploma

This one year diploma is designed to satisfy the demand for people who want to work towards their tech career, but either aren't able to devote the hours to the intensive program, or need to work while they are attending CodeCore College. This program offers all the content of the 12 week bootcamp, expanded and in more depth.

<p>HTML5 & CSS</p>	<p>Javascript & React.JS</p>
<p>Software Architecture & Object Oriented Development</p>	<p>Ruby On Rails</p>
<p>Popular APIs</p>	<p>Design & User Experience</p>

Program Courses:

- Building Web pages with HTML & CSS
- Version Control System (VCS)
- Programming Fundamentals
- Advanced Programming Concepts and Algorithms
- HTTP & Networking
- Database Fundamentals
- Web Applications and APIs
- Object Oriented Programming (OOP)
- Frontend Programming
- Production Readiness
- Job Preparedness
- Final Project

PROGRAM FACTS

- 48 Weeks -960 Hours
- Monday - Friday - 9am - 2pm
- Start Dates: September
- Co-Op Available
- Eligible for Study Permit
- Approx. 15 hours per week on homework
- Tuition: \$16 500
- Courses Held In New Westminster

Advanced Diploma in Computing: Software Development

This diploma delivers training on trending topics in the IT industry in a classroom setting. You will learn the modes of thinking associated with computer science as well as foundation software development languages, concepts and skills.

Project Management

Web Development

Object Oriented Analysis

Capstone Projects

Unit specifications: 1st Year

- Computer Systems Fundamentals
- Computing: Introduction to Project Management
- Computing: Software Development
- Database Design Fundamentals
- Developing Software: Introduction
- Mathematics for Computing 1
- Professionalism and Ethics in Computing
- Relational Database Management Systems
- SQL: Introduction
- Self Describing Data (XML)
- Software Development: Data Structures
- Software Development: Developing Small Scale Standalone Applications
- Software Development: Object Oriented Programming
- Software Development: Programming Foundations
- Software Development: Rapid Applications Development and Prototyping
- Systems Development: Object Oriented Analysis and Design
- Team Working in Computing
- Troubleshooting Computing Problems
- Web Development: Dynamically Generated Content

Destinations After this Program

Upon completion of this program, graduates may be eligible for advanced credit in the University of the Fraser Valley, Thompson Rivers University and University of Prince Edward Island.

Note: Subject to the availability of seats and meeting the admission eligibility criteria as per the accepting partner institution.

Health & Dental
& other expenses
\$ 1000 - \$ 1200

* All fees are subject to change without notice. These are strictly approximation for planning purpose only and cannot be guaranteed due to inflation, exchange rate fluctuations, and personal spending habits.

Student Success

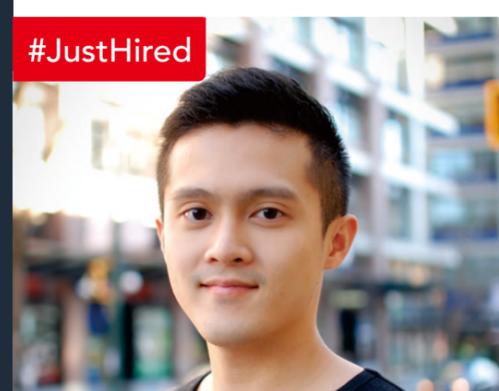

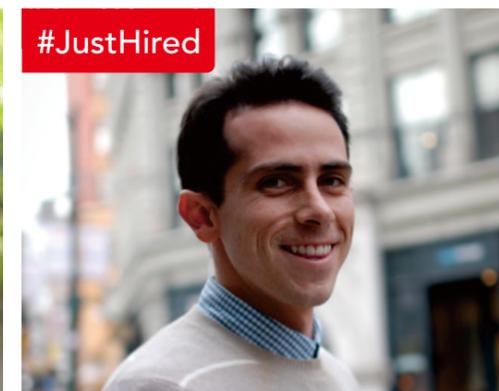

CodeCore Community:

Course Leads To Job For Homeless Father

SFU Continuing Studies and CodeCore teamed up earlier this year to deliver life-changing job skills to low-income, unemployed or underemployed residents in Vancouver's Downtown Eastside, one of Canada's poorest neighbourhoods.

For Peruvian native José Guerra, living in a Downtown Eastside (DTES) men's homeless shelter was a new low. But it was also a turning point after he learned of an SFU-CodeCore partnership training program that would eventually lead him to a job, allowing him to once again provide for his wife and four daughters.

"I am so happy and so very grateful," he says. "Everything fell into place. Even though sometimes I was discouraged, I kept going. It might have been easier staying in the shelter, being supported by the system. That's okay for some people, but for myself, I wanted something better. I kept trying, and it finally paid off."

Who Are Your Hiring Partners?

250 Hiring Partners
